

About the Sector

The biotechnology industry focuses on advancing scientific discovery through research and experimental development in the biological and life sciences. According to the North American Industry Classification System (NAICS) and the U.S. Bureau of Labor Statistics (BLS), biotechnology organizations apply scientific research to develop innovative products, processes, and technologies that support advancements in healthcare, pharmaceuticals, agriculture, environmental science, and related industries.

- US Census Bureau and the Bureau of Labor Statistics

About the Labor Market Intelligence Center

The Dallas College Labor Market Intelligence Center (LMIC) was established in 2015 to cultivate a healthy workforce ecosystem in the Dallas-Fort Worth metroplex. The team conducts research revolving around the local labor market, program alignment, and socioeconomic barriers that impact Dallas College students and the local community. The LMIC is committed to developing strategic research partnerships with internal partners and external organizations to deepen understanding of complex problems that impact Dallas College students.
